These styles offer
the perfect mix of
femininity and
up-to-the-minute flair.

UP-FRONT LAYERS

make super-long hair more flattering by enabling it to better frame the face. This style gets added mileage from narrow flecks of gold against a medium brunette basecolor. When you want to show off the layers even more, blow-dry with a large round brush, flipping ends up and adding curve to the bangs.

ALL-OUT TEXTURE

is a surefire way to bring out your sex appeal. For a special occasion, give your long, thick locks exciting bend by setting damp, gelled sections on sponge rollers wound in different directions. When hair is totally dry, remove the rollers and finger-brush to fullness.

FLICKED ENDS

a close-to-the-head crown and wispy fringe make a great combination, especially if your hair is fine and straight. For a hint of asymmetry, one side is slightly longer than the opposite.

Blow-dry the cut with a vented brush—it will only take minutes!

SLEEK LOCKS

are the hottest look of the moment, so if your hair is straight, let its natural assets shine through! Here, angled ends and a dramatic dip over one eye look so stunning in a deep shade of raven. Style mane with a paddle brush, then flat-iron and mist with shine spray.

SHIMMERING BLONDE

is the most striking element here. The hue works perfectly with the cut, which features up-front layers and full, angled fringe. Hair need only be blown-out with a large round brush. Use straightening balm to boost shine and smoothness.
